Art Unit: 3764

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gatts.

Gatts discloses classifying the body of a person (col. 7, lines 1-6), prescribing a first aerobic routine for the person (col. 7, lines 1-61).

As for the different species of exercises in the claims, they would be obvious variants to the exercises prescribed by Gatts, as Gatts discloses a plurality of exercises, and adding different exercises would achieve the same result.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clark discloses an apparatus and method of measuring body composition.

Nixxila discloses a determination of stress level of a fitness exercise.

Tsuda discloses an exercise apparatus having an exercise load changing function.

Shvartz et al disclose a universal fitness testing system.
